FOREIGN NEWS ON CITRUS FRUIT

- - - - -

THE CANADIAN MARKET FOR CITRUS FRUIT

The Canadian imports of oranges and lemons during the twelve months ended March 31, 1927, show an increase over those for the corresponding period of 1925-26 but imports of grapefruit declined, according to trade statistics just released by the Canadian Department of Trade and Commerce. Imports of oranges amounted to 2,263,000 boxes as compared with 1,730,000 boxes in 1925-26. Imports of lemons amounted to 386,000 boxes as against 346,000 the year before and grapefruit 2,545,000 boxes as against 2,665,000 boxes the preceding year. The United States is the principal source of supply for the Canadian citrus fruit imports, having furnished during the past year 95 per cent of the grapefruit and oranges, and 82 per cent of the lemons.

Canada also imports small quantities of grapefruit from Jamaica and Cuba and small quantities of oranges from Japan, Mexico and Spain. Considerable quantities of lemons, however, are imported from Sicily. These lemons constitute practically the only competition which American citrus fruit exporters have to meet in the Canadian market. The per capita consumption of citrus fruit in Canada is still considerably below that in the United States. During the past two Canadian fiscal years (April 1 to March 31) the per capita consumption of grapefruit in Canada averaged 1.9 pounds, that of lemons 2.9 pounds, and that of oranges 14.9 pounds per annum. In the United States the per capita consumption of grapefruit averaged, during the years 1924-1926, 5.3 pounds, that of lemons 4.7 pounds and that of oranges 17.3 pounds.

Over three-fifths of the total population of Canada is concentrated in the highly industrialized areas extending along the lower lakes and the St. Lawrence river. The actual per capita consumption in this relatively small area is no doubt somewhat higher than the statistical figure for all of Canada. The leading markets in this area are Montreal, Toronto, Hamilton, London, Quebec and Ottawa. The important markets in western Canada are Winnipeg, Regina, Calgary, Edmonton, Saskatoon and Vancouver. Each one of these markets serves as a distributing point for surrounding cities of lesser importance.

Oranges and grapefruit

While the United States supplies about 95 per cent of the oranges and grapefruit imported into Canada, a number of other countries contribute small quantities. Mandarin oranges from Japan have been a feature on the Canadian market at Christmas time for many years. Occasionally Mexican oranges are

seen on the market. Small quantities are also imported from Jamaica, and from Spain and Palestine. Orange growers in South Africa and Australia have been looking to the Canadian market as a possible outlet for their increasing production, but the lack of adequate transportation facilities as well as the availability of large sources of supply in California and Florida have thus far prevented competition from these sources. Receipts of American grapefruit in the Canadian market are heaviest during the months November to June inclusive. The small quantities imported from Jamaica and Cuba come in mostly from July to October and do not enter into serious competition with American fruit.

Lemons

American lemon shippers encounter keen competition from Sicily on the Canadian market. Lemons from California are at a considerable disadvantage because of the fact that Sicilian fruit can be sold at cheaper prices. Transportation costs have tended to divide the Canadian lemon market into two sections. Sicilian lemons cannot be disposed of profitably in the markets of western Canada in competition with California lemons because of the expensive rail haul from New York or eastern Canadian points to the Prairie Provinces. Most of the Sicilian lemons imported into Canada, therefore, are marketed in Montreal, Toronto, Hamilton, Ottawa, Quebec, and London. The western markets, such as Calgary, Winnipeg, Regina, and Edmonton, carry practically no lemons other than those from California. While regular series of lemon prices on Canadian markets are not available, such quotations as are published indicate that the American product sells at considerably higher prices in the western markets than in the eastern markets where they have to compete with relatively cheap lemons from Sicily.

The bulk of the Canadian imports of Italian lemons come in from June to December. Most of the fruit is landed at American ports and is trans-shipped into Canada because of the lack of transportation facilities connecting the Canadian and the Sicilian ports. Some Italian lemons are handled via British ports. These usually go into Canada via the St. Lawrence river before the close of navigation on that water route. The Canadian price on the bulk of the Italian lemons is the New York auction price plus the cost of transportation to Canadian markets and middlemen's profits.

Tariffs

Oranges and lemons enter Canada free of duty. Grapefruit from all countries outside of the British Empire, however, is dutiable at the rate of \$1.00 per 100 pounds. Imports from British possessions are granted a preference of \$0.50 per 100 pounds. The preference is particularly advantageous to shippers in Jamaica who ship between three-fourths and one million pounds of grapefruit to Canada annually. South Africa and Australia have requested special tariff preference on oranges but have not been successful in securing such treatment to date.

Transportation costs

The cost of the long rail haul from California and Florida to the markets of eastern and western Canads is an important factor in the competition which the American grower must meet in the Canadian market. The ocean and railroad freight on lemons from Palermo to Montreal works out at \$1.21 per case of 84 pounds gross, while the rate from Los Angeles to Montreal is \$1.26 per case. The freight to Winnipeg, however, favors the California shipper, the cost being \$2.43 per case from Palermo as against only \$1.39 per case from Los Angeles.

Ocean freight rates on citrus fruitOranges and grapefruit

From Kingston to New York	\$0.65 per box and \$1.30 per barrel
From Jamaica outports to New York	\$0.75 per box and \$1.50 per barrel
From Cuba to New York	\$0.50 per crate
From Japan to Vancouver	\$4.00 per 40 cubic feet

Lemons

From Palermo to New York	\$0.63 per box
From London to Montreal	\$12.15 per measurement ton
